

# MANUFACTURING

Order intelligence keeps your orders moving fast

## Built for Accuracy

Cut out waste and minimize errors with SalesPad® Manufacturing. Leverage this module to more efficiently create and update manufacturing BOMs and orders, without sacrificing accuracy.

Streamline and expedite the manufacturing process by managing it in SalesPad’s user-friendly interface. Generate MOs from sales orders or tie sales lines to existing MOs, then easily keep track of how your MOs tie to your sales demand.

“Prior to SalesPad®, order accuracy was a problem. [Before] we would miss pertinent notes...but now it’s just there automatically. We know it’s there—we’re confident it’s there.”

- Jason Jasperson, Executive VP at National Band Saw

## Key Features

- Set up details related to the Manufacturing Bill of Materials (BOM), including components, routing, and default issue locations
- Choose to backflush all components or specify backflush components at the item level
- Mass update BOMs, mass add/update/delete components, and mass approve BOMs
- Build workflows around manufacturing orders
- Create manufacturing orders and specify production quantities and issue locations
- Generate manufacturing orders directly from a sales document
- Link sales lines to existing manufacturing orders
- Review linked sales demand on manufacturing orders
