

DISTRIBUTION CLOUD

Distributor-designed order management

What is Cavallo® Distribution Cloud?

Distribution Cloud is a CRM, sales, and order-management system designed specifically for distributors using Microsoft Dynamics 365 Business Central. It empowers CSR and sales teams to provide an amazing customer experience while maximizing profits and efficiency, and it lets you:

- Maximize your profits on a per-order basis
- Manage customer relationships and increase customer engagement
- Increase control of your sales and order processes to improve accuracy, efficiency, and profitability
- Track the status of every order your company receives

What does it look like in action?

Distribution Cloud combines the flexibility of a CRM package with the breadth of data of an ERP system — without getting bogged down in too much detail. Achieve clearer inventory visibility, gain transparency into your order process, and provide better care for your customers, all with greater control over your sales and ordering operations.

DISTRIBUTION CLOUD'S GAME-CHANGERS

Distribution-specific

Business Central might be a Jack-of-all-trades, but Distribution Cloud is the master of distribution.

Command an expert-level understanding of distribution processes to increase the transaction speed of your business.

Clear visibility

Cut to the heart of your sales and order management. Quickly locate stock levels, item locations, customer order history, and more with minimal effort.

The data you need. Nothing you don't.

Minimize distractions and maximize accuracy by keeping all the necessary info at your fingertips. Distribution Cloud eliminates the background noise that so many other tools tolerate by displaying only the data relevant to the task.

Superior customer service

Engage with your customers at a higher level. Provide better detail about their accounts, track their order histories, and manage their needs with ease.

Customizable workflow

Reduce errors and increase efficiency with built-in accountability, consistency, and flexibility. Fine-tune your processes with extensive order-routing options, so you can process more orders and recognize more profit each day.
