Unlock the Power of Order Intelligence for Microsoft Dynamics 365 F&O

The Cavallo Order Intelligence Platform is built to supercharge your profits, giving you unmatched control over your orders.

- **Harness billions of data points** to uncover margin trends and hidden profit gaps that directly impact your bottom line.

- **Unleash the full potential of your ERP** with powerful, pre-built visualizations for variance, item, customer, and KPI trend analysis.

- **Expose actionable insights** to zero in on the factors driving margin performance — empowering you to act fast and boost profits.

Profit Analytics

Leverage data to analyze customer trends, optimize pricing, and master gross margin variance analysis. With this tool, you can spot margin leaks the moment they appear, keeping profits intact and on track and proactively pinpointing and tackling the root causes of erosion.

"I used customer churn, days since last order, and size of order to identify who to contact. This has led to my most successful [marketing] campaign ever."

- Jason Jasperson, Executive Vice President, National Band Saw
